SUMMARY

Motivated engineering student with strong passion for Artificial Intelligence and Machine Learning. Proficient in Python programming and data analysis with hands-on experience in real-world satellite data projects. Eager to leverage technical knowledge and problem-solving skills to contribute to innovative AI/ML initiatives. Seeking internship opportunities to gain practical experience and grow as an Applied AI/ML Engineer.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Indore Institute of Science and Technology, India

3rd Year | CGPA: 6.98 | Graduation: 2024-2027

PROJECT and Academic work:

1. Tropical Cloud Cluster Early Detection System Using INSAT-3D Data. *October 2025 -December 2025*

- Analyzed satellite meteorological data (INSAT-3D) to identify and detect tropical cloud cluster patterns with high accuracy
- Extracted and processed raw tabular satellite data into structured formats for comprehensive analysis and interpretation
- Created advanced visualizations and graphical representations to enhance weather pattern recognition and forecasting

2. Satellite Data Visualization Module

August 2025 - October 2025

- Designed and developed comprehensive visualization tools to transform raw satellite data into meaningful graphical insights
- Converted tabular data format into interactive graphical representations for improved data comprehension
- Improved data interpretation efficiency by enabling visual analysis instead of traditional manual observation methods

TECHNICAL SKILLS:

- **Programming Languages:** Python
- **Core Competencies:** Problem Solving, Data Analysis, Data Visualization, Artificial Intelligence Fundamentals, Machine Learning Fundamentals
- **Tools & Technologies:** Data Visualization Libraries, Python Libraries, Satellite Data Processing, NumPy, Pandas
- **Domains:** Artificial Intelligence, Machine Learning, Meteorology, Weather Analysis, Data Science

KEY STRENGTHS

- Strong willingness to learn and continuously adapt to emerging technologies
- Consistent and disciplined approach to academic and project work
- Honest assessment of skill levels and capability transparency
- Clear career vision and focused dedication to AI/ML domain expertise
